

QASWAR SARFRAZ

Software Engineer · Flutter Developer · AI Integration · Open to Work
qaswarsofttec@gmail.com · Islamabad, Pakistan · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

I am a Software Engineering student at the National University of Modern Languages (NUML) with a strong passion for building practical software solutions and exploring emerging technologies. Through academic projects, an industry internship, and self directed learning, I have developed experience in software development, mobile applications, and problem solving. I enjoy turning ideas into functional applications, learning new technologies, and continuously improving my technical and professional skills. Known for being a quick learner, adaptable team member, and project driven individual, I am seeking junior roles and remote opportunities where I can contribute, gain industry experience, and grow as a software engineer.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart

Programming Languages: Dart, Python(basic), Java

Backend & Databases: Supabase, Firebase, SQL.

AI & LLM Integration: Groq API (Llama 3.3 70B), REST APIs, LLM APIs

Web Technologies: HTML, CSS, JavaScript (frontend fundamentals)

Dev Tools & Platforms : VS Code, Android Studio, Agile & Scrum

EXPERIENCE

Mobile Application Developer

Jul 2026 to Sep 2026

CSOFT Systems · Internship

Faisalabad Division, Punjab, Pakistan · On site

Tech Stack: Flutter · Dart · Firebase · Cloud Firestore · Supabase

- ▶ Built and maintained Flutter mobile application features, working across the full stack from UI implementation to backend integration.
- ▶ Integrated Firebase, Cloud Firestore, and Supabase services for data storage, real time sync, and app infrastructure.
- ▶ Collaborated with the engineering team on software infrastructure and mobile application development best practices.
- ▶ Worked across multiple client projects during the internship, built end to end in Flutter.

PROJECTS

MentorLync: AI Powered Expert Consultation and Mentorship App

Sep 2026 to Present

Personal Project

Tech Stack: Flutter · Riverpod · GoRouter · Supabase · Google Gemini API · ZegoCloud · Firebase Cloud Messaging

- ▶ Built a full stack Flutter mobile app for paid expert consultations, offering in app chat, audio, and video sessions between Seekers and verified Experts.
- ▶ Integrated the Google Gemini API for an AI Assistant with a daily free tier quota, and ZegoCloud with Firebase Cloud Messaging for real time calling with native incoming call delivery.
- ▶ Designed a Supabase Postgres backend with row level security, real time chat, session credit purchases, Pro subscriptions, ratings, and safety reporting.

Tripline: Smart AI Powered Travel App

May 2026 to Jun 2026

Associated with National University of Modern Languages (NUML)

Tech Stack: Flutter · Dart · Supabase · PostgreSQL · Groq Llama 3.3 70B · Provider · REST APIs · Flutter Map

- ▶ Built a production grade, cross platform travel application using Flutter, Supabase, and the Groq Llama 3.3 70B AI engine to generate personalized itineraries and around the clock travel assistance.
- ▶ Implemented Provider based state management and a Supabase PostgreSQL backend with row level security policies for secure authentication and cloud persistence.
- ▶ Built expense tracking, offline mapping, and QR code based trip sharing, along with community boards and a Flutter Web Admin Dashboard for content moderation.

Car Parking Management System

2024

Tech Stack: Java · OOP · Design Patterns · CRUD Architecture

- Developed a Java based parking management system implementing full CRUD operations and core OOP principles including encapsulation, inheritance, and polymorphism.
- Applied modular design patterns for system maintainability; demonstrated clean code architecture and structured SDLC practices.

EDUCATION

B.S. in Software Engineering

National University of Modern Languages (NUML), Islamabad

Sep 2023 to June 2027

7th Semester | Expected Graduation: June 2027

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, OOP, Mobile Application Development, Software Engineering Principles.
- Activities: Active GitHub contributor, self directed and learning full stack mobile project development.
