

QASWAR SARFRAZ

Software Engineer · Flutter Developer · AI Integration · Open to Work
qaswarsofttec@gmail.com · Islamabad, Pakistan · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

I am a Software Engineering student at the National University of Modern Languages (NUML) with a strong passion for building practical software solutions and exploring emerging technologies. Through academic projects and self-directed learning, I have developed experience in software development, mobile applications and problem-solving. I enjoy turning ideas into functional applications, learning new technologies, and continuously improving my technical and professional skills. Known for being a quick learner, adaptable team member, and project-driven individual, I am seeking internship and entry-level opportunities where I can contribute, gain industry experience, and grow as a software engineer.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart

Programming Languages: Dart, Python(basic), Java

Backend & Databases: Supabase, Firebase, SQL.

AI & LLM Integration: Groq API (Llama 3.3 70B), LLM APIs

Web Technologies: HTML, CSS, JavaScript (frontend fundamentals)

Dev Tools & Platforms : VS Code, Android Studio, Agile & Scrum

EXPERIENCE

Mobile Application Developer

Jul 2026 – Present

CSOFT Systems · Internship

Faisalabad Division, Punjab, Pakistan · On-site

Tech Stack: Flutter · Dart · Firebase · Cloud Firestore · Supabase

- ▶ Building and maintaining Flutter mobile application features, working across the full stack from UI implementation to backend integration.
- ▶ Integrating Firebase, Cloud Firestore, and Supabase services for data storage, real-time sync, and app infrastructure.
- ▶ Collaborating with the engineering team on software infrastructure and mobile application development best practices.

PROJECTS

AI Face Scanner: AI Powered Facial Analysis Mobile Application

Jul 2026 to Aug 2026

Associated with CSOFT Systems

Tech Stack: Flutter · Dart · Riverpod · GoRouter · Supabase · Hive · Google Mobile Ads

- ▶ Built six AI powered facial analysis features including age and gender prediction, facial harmony scoring, face shape classification, resemblance comparison, symmetry analysis, and celebrity look alike matching.
- ▶ Translated high fidelity Figma designs into responsive Flutter UI components, and implemented app wide reactive state management with Riverpod and guard protected navigation using GoRouter.
- ▶ Integrated Supabase for authentication, database management, and cloud storage, along with Hive caching, rewarded video ads, and a premium subscription paywall.

Tripline: Smart AI Powered Travel App

May 2026 to Jun 2026

Associated with National University of Modern Languages (NUML)

Tech Stack: Flutter · Dart · Supabase · PostgreSQL · Groq Llama 3.3 70B · Provider · REST APIs · Flutter Map

- ▶ Built a production grade, cross platform travel application using Flutter, Supabase, and the Groq Llama 3.3 70B AI engine to generate personalized itineraries and around the clock travel assistance.
- ▶ Implemented Provider based state management and a Supabase PostgreSQL backend with row level security policies for secure authentication and cloud persistence.
- ▶ Built expense tracking, offline mapping, and QR code based trip sharing, along with community boards and a Flutter Web Admin Dashboard for content moderation.

Car Parking Management System

2024

Tech Stack: Java · OOP · Design Patterns · CRUD Architecture

- Developed a Java-based parking management system implementing full CRUD operations and core OOP principles — encapsulation, inheritance, and polymorphism.
- Applied modular design patterns for system maintainability; demonstrated clean code architecture and structured SDLC practices.

EDUCATION

B.S. in Software Engineering

National University of Modern Languages (NUML), Islamabad

Sep 2023 – June 2027

7th Semester | Expected Graduation: June 2027

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, OOP, Mobile Application Development, Software Engineering Principles.
- Activities: Active GitHub contributor; self-directed and learning full-stack mobile project development.

CERTIFICATIONS — COURSERA (VERIFIED)

• Introduction to Android Mobile Application Development	— Meta / Coursera	Jul 2024
• Agile Project Management	— Google / Coursera	Jul 2024
• Software Requirements Prioritization: Risk Analysis	— University of Colarado / Coursera	Oct 2024
• Introduction to Git and GitHub	— Google / Coursera	Jan 2025
• Programming for Everybody (Getting Started with Python)	— University of Michigan /	Jan 2025
• Python Data Structures	— University of Michigan / Coursera	Feb 2025
• Flutter and Dart: Developing iOS, Android, and Mobile Apps	— IBM / Coursera	Jul 2026
• Mobile App Notifications, Databases, & Publishing	— SkillUp / Higher Education Commission, Pakistan	Jul 2026

AVAILABILITY

- Fully available for internships (onsite, hybrid, remote) from July to September2026.
- Open to Internship roles from July 2026 onwards.
